

Pipe End Preparation Bench Mounted Pipe End Prep - RPG 4.5 S With Universal Vice-clamping

RPG 4.5 S is characterized by its universal vice-clamping system. With this particularly economical alternative to other conventional dimension-specific clamping collars, pipes from 12.7 to 114.3 millimeters (0.5 – 4.5") diameter and maximum wall thicknesses of 3 millimeters (0.12") can be centered, clamped and processed in the easiest way possible.

A high-quality, powerful drive which is available in either 230 or 120 V is the heart of the RPG 4.5 S.

Tubes: 12.7 mm to 114.3 mm
